French Rabbit Wines Hit the US

Boisset America has introduced a line of eco-friendly French rabbit wines and has joined American Forests (americanforests.org), the nation's oldest nonprofit citizens' conservation organization, to help restore the ecosystem one tree at a time. French rabbit wines, vintage-dates Pinot Noir, Chardonnay, Merlot, and Cabernet Sauvignon, are packaged in innovative, one-liter Tetra Pak containers called ePods. Ecological benefits of the ePod include reduced packaging waste, reduced CO2 emissions, and the use of renewable materials. For more information about French rabbit wines, visit frenchrabbit.com.
